SAN FRANCISCO, Calif. — **KACO new energy introduces new inverters at Intersolar North America, booth #7522**

KACO new energy, one of the world's largest inverter manufacturers - with over 3 GW of PV inverters in the field to date launches new inverters in the US.

KACO new energy is excited to introduce two new inverters to the North American market - the highly innovative blueplanet transformerless 7600M with integrated Tigo MMU as well as the blueplanet XP10U-H4. Perfectly suited for residential and commercial applications both inverters feature enhanced and technologically advanced features that will make installation more convenient. Their competitive pricing will help lower the cost of a PV system.

The innovative blueplanet 7600M with integrated Tigo MMU is designed for maximum flexibility. KACO plans to be one of the few inverter manufacturers in America that sells inverters with a fully integrated DC – DC maximization systems. The 7.6 kW single-phase 240 V_{AC} / 208 V_{AC} transformerless inverter comes with 96.5% CEC efficiency. The reduced amount of components makes the inverter extremely durable and reliable. An integrated "Fireman's friend" button ensures fireman safety on rooftops. The units will be available in the third quarter of 2011.

KACO's blueplanet XP10U-H4 is a 10 kW three-phase 480 V_{AC} transformerless inverter. It comes with 98% CEC efficiency and dual MPP tracking, which gives the system a lot of flexibility. A graphic display and an integrated web server make system monitoring easier than ever. The very compact design and the fact that the XP10U-H4 is a wall-mount inverter allow for the most convenient and fast installation. The inverters will be available in the fourth quarter of 2011.

Visit the KACO booth #7522 at the Intersolar show at the Moscone Center on July 12th – 14th.

ABOUT KACO:

A powerful partner for PV system solutions, KACO new energy has built a tradition of excellence in the photovoltaic inverter and power electronics industries. Our German-based factory engineers have been developing, designing and manufacturing current inverters and power electronics for more than 60 years.

The KACO blueplanet product family has set new standards in photovoltaic applications - particularly in reliability, efficiency, power density, and patented technology to meet NEC requirements. As the heart of your photovoltaic installation, your KACO inverter pumps electricity into the public grid continuously and efficiently. The efficiency of the KACO blueplanet inverters will earn you money and a solid return on your solar investment. Additional information about KACO is available at www.kaco-newenergy.com.
