San Francisco, CA 94129

## **KACO Solar Inc. releases complete KACO inverter grid tied blue planet inverter series with accessories in conjunction with Solar Power 2006 the largest solar conference in American history.**

After many years of successful operation in the European and Asian markets KACO brand inverters from 1.5 kW to 4.5 kW<sub>AC</sub> will be available for sale in the United States at competitive price levels. Our wildly successful engineering team in Neckarsulm Germany has only spent a little over a year to completely certify the full KACO blue planet product line.

A full range of accessories is available including the KACO *prolog*, which gives consumers complete logistical monitoring capability with their solar installation. KACO also provides customers with the free downloadable KACOCalc software, available at <http://www.kacosolar.com/DLCenter.shtml>. This system sizing program aids even the novice solar installer to determine which KACO inverter will best suit the solar panels they choose to install.

KACO products are now available at KACO partners such as Ribic's Wind & Solar in Spokane, WA, Krannich Solar in Hainesport, NJ, and Sacred Power in Albuquerque, NM. If you have interest in becoming a registered KACO partner contact Clint Porter at 415-931-2046 or [cp@kacosolar.com](mailto:cp@kacosolar.com). KACO is happy to speak to you about your questions about solar power or our distribution procedures.
