SAN FRANCISCO, Calif. — February 13th, 2008 — For many folks their Solar Power 2007 Expo in Long Beach agenda was packed with beautifully orchestrated parties. Most companies hosted an event that had been planned for months prior. KACO Solar was no different. In addition to hosting over 100 of their closest partners and potential clients on a pleasure cruise ship for a few relaxing hours taking in the beautiful views of the Long Beach coastline, KACO offered their guests the opportunity to participate in a raffle on board. The grand prize was a free trip for two to Neckarsulm, Germany; home to KACO headquarters and manufacturing facilities. After giving away a handful of great prizes including KACO products and gift certificates Carlos Babij of SPG Solar was chosen by Sue Kateley of CAL SEIA from a KACO cap as the lucky winner of the trip. Carlos was ecstatic and swore on board "I've never won anything like this before in my life!"

After two months of eager anticipation Carlos and his lovely wife Duffy Ross boarded a Lufthansa flight and were taken to Neckarsulm. The pair was greeted by two of KACO Gerätetechnik's top leaders Ralf Hofman and Matthias Haag. After spending some quality time at the lovely and luxurious Insel Hotel in downtown Neckarsulm the couple was given the grand tour of all three facilities in KACO's electric vehicles. Carlos and

Duffy spent a week touring the area around Neckarsulm and shared a medieval dinner with KACO sales team and management and walked the beautiful Neckar river. Ralf Hofman, president of

The Neckar River, Germany

KACO Gerätetechnik GmbH held a special dinner in their honor.

Carlos made a point of mentioning that Mr. Hofman was one of the funniest and welcoming people he met while in Germany.

KACO is serious about showing the US solar industry the top notch quality procedures that have been put in place to produce

the KACO blueplanet inverters. KACO has made producing an inverter with near 99.99% uptime their most important priority. In addition to ensuring a fail proof product KACO guarantees that the inverters they produce also result in zero carbon emissions during their creation. In order to ensure US installers are aware of how important these two distinct and important missions are to them, KACO will continue to send KACO partners to their factories. KACO Solar is looking forward to offering other installers this wonderful opportunity. If you are interested in going to Germany and learning first hand about a truly superior inverter that is manufactured using a zero emissions manufacturing technique, contact KACO today at 866-522-7652 or visit: <http://www.kacosolar.com/tripdetails>

More about KACO Solar, Inc.:

A powerful partner for PV system solutions, KACO Solar has built a tradition of excellence in the photovoltaic inverter and power electronics industries. Our German-based factory engineers have been developing, designing and manufacturing current inverters and power electronics for more than 60 years.

KACO SOLAR USA talks about SPG Solar in Germany

The KACO blueplanet product family has set new standards in photovoltaic applications - particularly in reliability, efficiency, power density, and patented technology to meet NEC requirements. As the heart of your photovoltaic installation, your KACO inverter pumps electricity into the public grid continuously and efficiently, earning you money and a solid return on investment.
