

KACO inSIGHT

the new RSS feed - wireless access to PV data

The KACO inSIGHT RSS feed is the future of PV monitoring. A live RSS feed will continuously feed your real time PV data to a wireless device such as a smartphone, computer, or digital picture frame. KACO is the industry leader in wireless PV monitoring technology.

Now it is easy to access your most important PV information. We suggest connecting the KACO inSIGHT RSS feed with the KACO sunWATCH digital touch screen picture frame to make your PV system the most talked about and viewed possession in your home. KACO offers the sunWATCH digital touch screen frame separately.

features

- Affordable and reliable wireless access to monitoring data
- Live access to production data through a Wi-Fi enabled monitoring device
- Watch your PV data from anywhere
- PV data updates every 15 minute
